Personal Details

DOB: - 04-03-1998
Address:-Jatoi, Mursan
Hathras 204213
Nationality: - Indian
Language Known: English
Hindi, Gujarati

Career Objective

Passionate engineer seeks fast-paced role. Strong project management, teamwork, and software skills. Committed to quality solutions.

Skills

- J2SE(core-java)
- J2EE Programming
- MySQL , NoSQL
- Web development
- Frontend & Backend
- API Testing
- Spring, SpringBoot
- Hibernate
- AWS
- Asp Dot Net
- Debugging, Testing,Trouble shooting

Certification

Certified **PGDAC** course from the **CDAC**

Project

Event Management System

Project Description

Implemented a Event Management System that utilized RESTful web services and generated JSON data. Developed key functionalities for adding, updating, deleting, and viewing Event records.

Roles and Responsibilities:

- Role: Software Engineer/Developer
- Developed a REST API using Spring Boot and Hibernate for a Event Management Application.
- Implemented CRUD operations for Event and event category entities.
- Collaborated closely with the team to ensure quality assurance, conducting testing, and addressing bug fixes promptly.
- Maintained coding standards, followed design patterns, and prioritized reliability, security, and scalability in the development of the system.
- Collaborated with the team to troubleshoot and debug issues.

TECHNICAL SKILLS :

Operating Systems: Windows XP, Windows 7, Windows 11, Linux

Programming: Core JAVA, WEB JAVA, JavaScript, Dot NET

Web Technologies : JSP, Servlet , Bootstrap, React, HTML, CSS, Express

Databases: MySQL, NoSQL (MongoDb)

API Testing: Postman, Ajax

Cloud: AWS

Tools : Eclipse, VS-Code, Docker, Kubernetes, Jenkins, Jira, Visual Studio
Microsoft Office: Word, PPT, Excel

PROFESSIONAL SYNOPSIS

Areas of J2SE Involvement :

- Proficient in multiple **programming languages** such as **Java, JavaScript** etc.
- **Good understanding of Core JAVA, OOPS Concept, Array and String class, Collection framework, Generics, Exception Handling**
- Knowledgeable in **data structures (lists, sets, maps)** from **Collections framework,** enabling efficient data manipulation and storage.
- Good Knowledge of **Software Development Life Cycle (SDLC) .**
- Experience in backend **database** operations using **JDBC**: **SQL queries, CRUD operations**, and database optimization.
- Basic Knowledge about **LINUX** Commands.

Areas of J2EE Involvement :

- Experience in developing applications using **Spring Boot**.
- Proficient in **Spring framework**, including **Spring Core**, **Spring MVC**, and **Spring Security**.
- Knowledgeable in **Hibernate ORM** (Object-Relational Mapping), enabling seamless interaction with databases and efficient data persistence
- Proficient in using **Maven** as a build **automation tool**, including managing **dependencies** and configuring projects through **POM files**.
- Experienced in working with **XML** for application configuration and **JSON** for efficient data interchange
-

Strength:

- Excellent communication skills
- Quick learner, adaptable to new technologies and concepts
- Strong decision-making capabilities
- Ability to work effectively in a team or teamwork

I hereby declare that all the details provide above are true to the best of my knowledge.
